**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-8, 11 and 12 drawn to a gaming console architecture and an electronic gaming machine, classified in class 463, subclass 43.
- II. Claims 9, 10 and 13-18 drawn to a distributed gaming system with a server, classified in class 463, subclass 40.

Inventions I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the distributed gaming system does not require the specific gaming console or electronic gaming machines described in invention I. The subcombination has separate utility such as use as a gaming console or gaming machine separate from a distributed gaming system not requiring the use of a server.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
